## Client Confidentiality and Release Form

I understand this modality is not a replacement for medical care. The practitioner does not diagnose medical illness, disease or other physical or mental conditions unless specified under his/her professional scope of practice. As such, the practitioner does not prescribe medical treatment of pharmaceuticals, nor does he/she perform spinal manipulations (unless specified under his/her professional scope of practice). The practitioner may recommend referral to a qualified health care professional for any physical or emotional conditions I may have. I have stated all my known conditions and take it upon myself to keep the therapist/practitioner updated on my health.

Confidentiality of medical and personal information obtained during the course of the practitioner's work is of the utmost importance. HIPAA regulations require all practitioners obtain a signed release form from their client *before* taking any information about them. The best way to be fully compliant is to obtain this release signature at the initial consultation. Clients should receive a copy of the form they signed (upon request), and the practitioner maintains a copy for their records
